Meet the UniCarriers family

# With the DNA for maximum uptime

UniCarriers designs, manufactures and supports the most advanced material handling equipment. By integrating the three distinctive brands of Atlet, Nissan Forklift and TCM, UniCarriers is the perfect mixture of Japanese quality and technology, Swedish design and ergonomics and German innovative spirit for the material handling industry. UniCarriers represents more than 65 years of industry experience, an unparalleled global reach and deep understanding of local markets.

Flexibility and reliability are essential to survive and prosper in today's business environment. And nowhere is this more evident than in the material handling industry. That's why we at UniCarriers have pioneered a unique product concept that increases reliability through component flexibility and modularisation. Thanks to this, we can offer thousands of customised UniCarriers truck variants – each one built with exceptional technical and ergonomic standards for your specialised tasks – with interchangeable components. This concept also allows us to minimise the number of parts and components, which is one of the reasons behind UniCarriers' superior after-sales service. By only having to deal with a limited number of components, our mobile service engineers can fix over 95% of all breakdowns – on the first visit. UniCarriers engineering simply translates into less downtime and more uptime. And that can mean a lot for your business.

price?**

## Reduce your Total Cost of Operation with UniCarriers

We agree. Price is everything. Or to be more specific: your Total Cost of Operation (TCO). That's why we're so focused on cutting costs and improving your material handling. The truck and its performance play an important role, but this is even more about how we can support you in optimising your warehouse operations to give you the best value for your money. Which – in the long run – is what creates a winner.
